Professional Summary

Final-year B.Tech Information Technology student with strong skills in MERN stack development and hands-on experience in building real-world ERP systems. Experienced in developing scalable web applications, secure REST APIs, and working with enterprise workflows using Odoo ERP and custom-built systems. Passionate about solving real-world problems through software and continuously improving system performance, reliability, and user experience.

Skills

- **Languages:** Python, JavaScript, Java, C, SQL
- **Web Development:** React.js, Node.js, Express.js, MongoDB, HTML, CSS, Redux, REST APIs, JWT, Bootstrap, Tailwind CSS
- **AI/ML:** Scikit-learn, Pandas, NumPy, Regression, Random Forest, Model Evaluation
- **Databases:** MongoDB, PostgreSQL (basic working knowledge through Odoo)
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Render, Netlify, Vercel, Cloudinary
- **ERP & Systems:** Odoo ERP, Custom ERP Development, API Integration

Experience

IT Intern

(Dec 2025- Present)

Yantra Design Pvt. Ltd., Surat

- Collaborated with a cross-functional team to work on enterprise ERP systems (Odoo & custom ERP), implementing end-to-end workflows across CRM, Sales, Inventory, Manufacturing, and HRMS modules.
- Contributed to the design and development of a custom ERP system from scratch, integrating Sales, Purchase, Manufacturing, and CRM modules with real-time data flow.
- Built and optimized quotation workflow (Lead → Opportunity → Quotation → Proforma Invoice) with automated numbering, pricing logic, and PDF generation.
- Implemented automatic machine selection logic in quotations based on input parameters, improving accuracy and reducing manual effort.
- Developed and customized ERP modules using Python, ORM, XML, and QWeb, including dynamic UI, filters, and branded reports.
- Worked with team members to integrate external CRM with ERP using APIs and automated synchronization via scheduled jobs (cron).
- Improved system performance and reliability by debugging workflows, implementing RBAC & HRMS features, and supporting deployment on VPS with PostgreSQL and Git.

Node.js Development Intern

(June 2025 – July 2025)

Webito Infotech, Surat, Gujarat

- Gained hands-on experience in building real-world backend systems using Node.js, Express, and MongoDB.
- Worked on developing secure REST APIs, implementing JWT authentication, and integrating backend with frontend features.
- Collaborated with the team in a professional environment using Git, Postman, and Render for version control, testing, and deployment.
- Integrated third-party APIs (Hugging Face, Gemini) and implemented file upload features using Cloudinary.
- Deployed full-stack applications and ensured proper API testing, error handling, and performance optimization.
- Designed modular and scalable backend architecture, improving code maintainability and reusability.

Projects

Enterprise Inventory Management ERP (Production System)

- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, Tailwind CSS
- Designed and developed a production-grade ERP system actively used at Welltouch Hygiene Pvt. Ltd. for managing daily operations
- Built end-to-end workflow automation (Production → Dispatch → Delivery → Transport), reducing manual processes
- Implemented real-time inventory tracking and stock synchronization for accurate data management
- Developed dynamic dashboards and automated PDF challan generation for reporting and documentation
- Designed a centralized system with role-based access control (RBAC) for secure multi-user operations

Virtual AI Assistant

- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Google Gemini API, Web Speech API
- Developed a voice-enabled AI assistant during internship using MERN stack and Gemini API.
- Integrated real-time speech recognition and text-to-speech for natural voice interaction.
- Customizable UI with support for user-defined assistant name, avatar, and branding.

Loan Default Prediction

- **Tech Stack:** Python, Scikit-learn, Random Forest, Machine Learning
- Trained a model using Random Forest to predict loan defaults.
- Preprocessed data with encoding and scaling techniques.
- Evaluated model using F1-score, precision, recall, and ROC-AUC.

Task Manager Web App

- **Tech Stack:** Node.js, Express.js, EJS, MongoDB, JWT, CSS
- Built a full-stack task manager with JWT authentication, MongoDB, and EJS templating.
- Integrated AI-based task categorization using Hugging Face zero-shot model.
- Deployed on Render and tested RESTful APIs using Postman during internship

Education

B.Tech in Information Technology

(2022 - Present)

Chhotubhai Gopalbhai Patel Institute of Technology,

Uka Tarsadia University, Surat, Gujarat

CGPA: 9.19 (Till 7th Semester)

12th with PCM (GSHEB)

(March 2022)

Sanskar Vidhyalay, Kim, Surat, Gujarat

Percentage: 73%

10th (GSHEB)

(March 2020)

Shree Kalyan Vidhyalay, Kalyanpura, Kadi, Gujarat

Percentage: 77%

Achievements

- **Consistently ranked in the top 10%** academically in the IT branch; earned admission through the **Tuition Fee Waiver (TFW)** scheme for outstanding academic performance.
- **Participated in Smart India Hackathon**, one of India's premier national-level innovation challenges.
- **Participated in TATTVAHACK 2K25**, a hackathon organized by **CGPIT in collaboration with August Infotech**.
- Secured **2nd Runner-Up** in the **"Fastest Coder First"** event at **SciClone 2K24**, hosted by CGPIT, UTU.
- Completed **Generative AI Exchange Program (Google Cloud - Hack2Skill, 2025)**, gaining hands-on experience in Gemini API, Vertex AI, prompt engineering, and RAG
